HEAR THE WORLD

Driven by Tempus

unitron Hearing matters

A Sonova brand

Revolutionary

Stride MR

The behind-the-ear rechargeable that's based on award-winning design and always ready for anything.

reliability

Hearing happens around the clock. Our rechargeable styles give patients the flexibility to swap rechargeable batteries with disposable batteries at any time, so they never run out of charge.

ease of use

Give patients the freedom to charge and go. They simply pull the rechargeable hearing instruments out of the charger and put them on, with no fuss or buttons to fiddle with.

design

Two sophisticated styles based on award-winning designs go the distance to keep patients in the conversation for as long as they need.

performance

All our rechargeable hearing instruments are driven by Tempus™, our newest platform that is the best in conversations.

70% of patients want rechargeable hearing instruments*. Our solutions give them 24 hours of use that includes 90 minutes of streaming or 16 hours of continuous streaming, after charging for just 5-7 hours.

“

It frees my clients from the worry of their batteries going dead at the most inconvenient times.

Lynne, hearing healthcare professional from the UK

”
